Profile

Innovative and experienced BEng Software Engineering graduate fluent in Spanish and English. Demonstrates a robust "get things done" attitude, an exceptional sense of ownership, and a deep understanding of engineering fundamentals. Proven track record in managing complex software projects and working in dynamic teams to exceed standards in software development.

Education

BEng (Hons), Software Engineering   *2020–2024*
Edinburgh Napier University, Edinburgh, UK

- Achieved with a first-class average of 80%, with a curriculum focused on advanced software engineering principles and best practices.
- Acquired skills in object-oriented programming, secure software design, and agile project management.

Technical College   *2018–2020*
Colegio Tajamar, Madrid, Spain

- Specialised in Computer Science, Physics, and Mathematics, achieving a grade of 9.4/10.

Professional Experience

Software Engineer   *May 2024–Present*
TaxCoder, Edinburgh, UK

- Joined a startup providing comprehensive tax support and expert accounting services through a cutting-edge online platform.
- Led the development of web applications using Python Django, HTML5, CSS3, Bootstrap, and PostgreSQL on AWS, driving product innovation and operational efficiencies.
- Led a dynamic team of 3, instilling a culture of problem-solving, proactive development, and continuous learning.

QA Engineer   *Sep 2023–May 2024*
Infographics UK Ltd, Edinburgh, UK

- Led automated QA testing on Azure DevOps using Selenium, increasing product reliability, and reducing manual testing tasks by 30%.
- Offered a part-time position due to outstanding performance during internship, continuing to improve product quality.

Software Engineer Intern   *Jun 2022–Sep 2023*
Infographics UK Ltd, Edinburgh, UK

- Developed and optimised C# code, improving application performance and fixing bugs highlighted by the customers.
- Enhanced team's agility and productivity through mastery of Scrum processes and integration of MS DevOps systems.

Student Ambassador   *Sep 2020–May 2022*
Edinburgh Napier University, Edinburgh, UK

- Enhanced university-community relations by engaging with diverse student groups.
- Aided the university team by speaking at a partners conference about student experience convincingly, positively influencing multiple stakeholders.

Technical Skills

Languages & Frameworks: Python (Django), C#, Java, JavaScript (Node.js, Express.js, ReactJS), Kotlin
Databases: PostgreSQL, MongoDB, SQL, NoSQL
Tools & Platforms: GitHub, AWS, Docker, Android Studio, Linux
Web Development: HTML5, CSS3, Bootstrap, AJAX
Software Practices: Secure coding, CI/CD, Agile methodologies, DevOps

Projects

Developed diverse applications ranging from mobile apps and web platforms. Available on my GitHub.
